

FRAMES™

Panel System

WHAT'S NEW

Watson introduces a new and refreshed FRAMES Panel System, ideal for dividing team spaces and providing power, voice, and data to open plan workstations. The new FRAMES panel size logic has been refined to include segmented panels that seamlessly meet the desk at belt-line, cohesively framing space for collaborative communication, seated or standing privacy.

WHAT'S DIFFERENT

FRAMES is available in three heights - 42", 54" and 66", and six widths - 24", 30", 36", 42", 48", 60". A crisp crown-top detail is intended to blend aesthetically in any office setting and a low-profile foot has been added for increased stability.

STATEMENT OF LINE

Available in 3 heights and 6 widths, FRAMES may be specified as monolithic panels with laminate or fabric, or as segmented panels with a combination of laminate, fabric, and/or glass. A power, voice, and data raceway provides four power connections per panel for streamlined cable management in team spaces.

* 60" wide available only in Monolithic Fabric and Segmented Fabric with Glass.

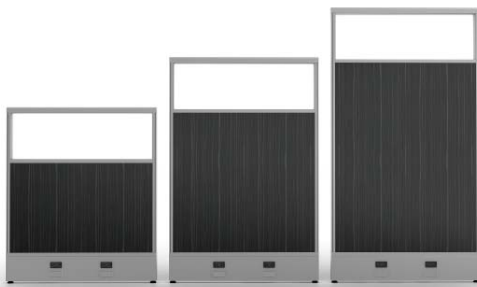

MONOLITHIC: LAMINATE

MONOLITHIC: FABRIC*

SEGMENTED: FABRIC WITH GLASS*

SEGMENTED: LAMINATE WITH GLASS

SEGMENTED: LAMINATE WITH FABRIC

SEGMENTED: LAMINATE WITH FABRIC & GLASS
