# Jot Board & Tak Screen

The Jot Board and Tak Screen provide a simple, smart solution for privacy and space division. Finished on both sides with marker board laminate, the Jot Board is ideal for deadline-driven and team environments. The Tak Screen provides a more traditional dual-sided, fabric covered surface. Whether the Tak Screen or Jot Board best meets your needs, both are available 2 heights, 3 styles and lengths to accommodate Watson's full breadth of desk choices. Universally compatible with all Watson Desking worksurfaces and edge profiles, the clamp-on assembly makes Jot and Tak easy to install and reconfigure. Both products are also available as a stand-alone, tabletop version - a value for space division within benching applications.

## Accessory Tray & Bins

An optional accessory tray sits on top of the surface mounts that secure the screen to the desks. The tray is available in four lengths (21, 30, 39, and 57 inches) and comes equipped with two accessory bins for added function and value. Accessory bins can be used independently to hold multiple pens and pencils or combined to secure documents and folders.

## Mounting Options

### Above

Available in 15" or 20" heights, the Tak Screen and Jot Board Above are designed to provide fixed desktop privacy.

### Above w/ ZO denza

The Jot Board and Tak Screen Above easily clamps in to the back channel of the ZO denza, providing secure space division between workspaces.

### Above/Below

The 20" Tak Screen and Jot Board Above/Below both provide privacy above the desk surface and screening below the beltline.

### Desktop

At 10.75" high, the freestanding Tak Screen and Jot Board Desktop is ideal for subdividing larger surfaces or movable space division.
